

## Digi International Brings Global IoT Leadership to Minnesota-based IoT Fuse Conference

April 24, 2018

### Digi IoT Expertise and Continued Sponsorship Assists Makers, Innovators and Business Leaders in Sparking Innovation for the Internet of Things

MINNETONKA, Minn., April 24, 2018 /PRNewswire/ -- Digi International®, (NASDAQ: DGII), ([www.digi.com](http://www.digi.com)), a leading global provider of Internet of Things (IoT) connectivity products and services, today announced its continued participation and support of what has become a nationally recognized IoT conference – [IoT Fuse](#), taking place on May 3, 2018 at the Minneapolis Convention Center. Digi will join a community of IoT practitioners, developers and makers who strive to build a deeper understanding of where the IoT is today, the direction it is headed, and how IoT-associated technologies and applications can be used to improve the world in which we live.

Now in its second year as a platinum sponsor of IoT Fuse, Digi will present a workshop leading up to the conference and host individual sessions during the conference itself. Digi is also exhibiting at the tradeshow at booth #1.

Click to Tweet:

As the platinum sponsor of #IoTfuse for the second consecutive year, we are excited to present a Digi #XBee3 workshop and host several #IoT focused speaking sessions. Join us and read more: <https://ctt.ec/L60U1>

#### IoT Fuse Workshop:

Leading up to IoT Fuse, Robert Faludi, Digi XBee expert and author, will host the [Industrial Strength IoT Workshop: Digi XBee Cellular + Amazon IoT](#), on May 2 at 1:15 p.m. CDT in Terr. Murphy Hall, Room 446, at the University of St. Thomas - Minneapolis Campus. During this workshop, he will assist attendees in gaining a better understanding of key elements involved in IoT cloud connectivity, including electronic sensing and cellular networking. Faludi will provide hands-on exposure to connections, configurations, and code that enable high-quality links from a connected industrial device in the field to a managed cloud platform in a commercial IoT installation.

#### IoT Presentation Sessions:

Digi will be presenting three informational sessions examining the key factors driving the growth of the IoT:

- [What Are the Necessary Attributes of Smart IoT Devices?:](#) Taking place on May 3 at 10:00 a.m. CDT in room MCC 200, Digi's Vice President of Product, Scott Nelson, will discuss the attributes of smart edge devices and how their use is becoming more common. He will also discuss the impact of increased intelligence at the edge of the network and what exactly makes these devices smart.
- [Designing for the Next Wave of IoT: Examining Trends, Wireless Technologies and Lessons Learned:](#) Taking place on May 3 at 1:00 p.m. CDT in room MCC 201, Solution Architect for Digi Design Services, Kevin Eichhorst, will discuss key factors to consider when designing the next wave of IoT products. The session will include a discussion of trends that are fading and those that are gaining momentum, as well as new wireless technologies coming to market that will drastically lower the barriers to entry for IoT products.
- [Ice Resurfacing Just Got a Whole Lot Smarter by Zamboni:](#) Taking place on May 3 at 3:30 p.m. CDT in room MCC 204, Julian Gardner, Zamboni senior research engineer, will discuss how Zamboni continues its pioneering tradition with the launch of Zamboni Connect™, the first IoT-connected ice resurfacing machine. This Digi-enabled IoT ice resurfer and application delivers real-time diagnostics of operator and resurfacing performance. The presentation will cover how the service has led to improvements in asset and resource management, and better decision-making to help ensure the highest levels of machine operation and uptime – and, of course, ice quality.
