Digi International Announces Full Availability of Digi ConnectCore® 8X Development Kits

June 4, 2019

Purpose-built for demanding IoT environments, Digi ConnectCore 8X provides a complete and secure system platform to build connected intelligent devices

HOPKINS, Minn., June 4, 2019 /PRNewswire/ -- Digi International®, (NASDAQ: DGII), (www.digi.com), a leading global provider of Internet of Things (IoT) connectivity products and services, today announced the full availability of its Digi ConnectCore 8X development kits.

Digi International introduced the Digi ConnectCore 8X, a powerful, secure and cost-effective off-the-shelf single board computer (SBC) with support for Linux and Android, as a connected system solution concept for device manufacturers building edge-intelligent products. Now, development kits are widely available to deliver on the Digi promise of Hardware-Enabled, Software-Defined™ connectivity solutions.

The Digi ConnectCore 8X offers cloud and edge-compute services integration while reducing time-to-market by eliminating traditional risk, effort, and complexity of custom board designs without sacrificing flexibility or capabilities. Other key features include:

- Industrial i.MX 8X quad core SOM and SBC platform family
- Compact form factor integrates an on-board dual-band antenna option, USB connectivity, Digi XBee® RF connector and cellular connectivity options
- Multi-display/camera and audio support
- External storage and expansion connectors
- Power management with both hardware and software support for low-power designs
- Built-in Digi TrustFence® security framework featuring secure boot, encrypted filesystems and protected ports
