

Digi International Joins STMicroelectronics Partner Program to Provide System-on-Module Solutions to Industrial, Medical and Transportation Markets

June 21, 2022

Global IoT Leaders in Internet of Things Solutions Join Forces to Simplify Design of Enterprise Solutions

HOPKINS, Minn.--(BUSINESS WIRE)--Jun. 21, 2022-- Digi International, (NASDAQ: DGII, www.digi.com), a leading global provider of Internet of Things (IoT) solutions, connectivity products, and services, today announced it has joined the [STMicroelectronics](#) Partner Program to simplify the design of end-to-end solutions—reducing product development efforts and accelerating time to market—that better serve customers' business needs.

"As digital transformation increases the complexity of product-design challenges, participating as an Authorized ST Partner will help enterprises deploy sophisticated IoT solutions that leverage intelligent, connected edge-computing designs," said Andreas Burghart, senior product manager for Digi. "In tightly regulated markets such as transportation, healthcare, and manufacturing, our expertise and strengths layered on top of ST's products and technologies will provide organizations with the scalability and compatibility they need to create smarter IoT applications. Our off-the-shelf solutions offer more features with a lower total cost of ownership to help them unleash new levels of innovation."

STMicroelectronics, a global semiconductor leader serving customers across the spectrum of electronics applications, created the ST Partner Program to speed customer development efforts by identifying and highlighting to them companies with complementary products and services. Moreover, the program's certification process assures that all partners are periodically vetted for quality and competence. For more information, please visit <http://www.st.com/partners>.
