Digi International Reveals 2026 Green Tech Customer Innovation Award Honorees

sustainability challenges. Their solutions enable smarter resource management, reduce environmental impact, and help organizations meet increasingly ambitious sustainability goals.

Among this year's honorees is [Hexagon](#), recognized in the Precision Agriculture category for its advanced technologies that empower farmers to make data-driven decisions, optimize inputs, and improve crop yields while conserving water and energy resources.

"We are honored to be recognized by Digi International for our work in precision agriculture," said Hugo Fagundes, Product Manager in the Agriculture Division at Hexagon. "By combining reliable IoT connectivity with centimeter-level, multi-constellation GNSS and machine control, we help growers reduce inputs and emissions while increasing uptime and productivity. Collaborations like this are essential to building a more sustainable future for agriculture worldwide."

The 2026 Green Tech Customer Innovation Award winners span five categories and represent a diverse range of industries:

- **Precision Agriculture:** [Hexagon](#)
- **Smart Lighting:** [RAB Lighting](#)
- **Smart Water Management:** [XiO Water](#)
- **Smart Metering:** [Radius](#)
- **Smart Sensing and Control:** [Alert Labs](#)

"These organizations are leading the way in demonstrating how IoT technology can be harnessed to solve some of the world's most pressing environmental challenges," said Ron Konezny, President and CEO of Digi International. "We are proud to work with customers who are pushing the boundaries of innovation to improve efficiency, conserve critical resources, and build more sustainable systems. Their achievements highlight the powerful role that connected technologies play in shaping a more responsible and resilient future."

Digi International remains committed to supporting its customers as they design and deploy solutions that drive meaningful environmental progress. Across a wide range of industries, including agriculture, water management, energy, and smart infrastructure, Digi's customers continue to lead the charge in building a more sustainable world through IoT innovation.

Digi International will also host a Green Tech webinar on April 22, 2026, bringing together industry experts and award winners to discuss emerging trends, real-world applications, and the future of sustainable IoT innovation. Attendees will gain insights into how connected technologies are driving measurable environmental impact across sectors. To learn more and register for the webinar, please visit the [event registration page on Digi.com](#).
